Height and weight checks for children in Reception and Year 6

Every year in England, school children in Reception and Year 6 have their height and weight checked at school as part of the National Child Measurement Programme. Height and weight measurements are used to calculate weight status. We collect this information because it is in the public interest to understand how many children are overweight, healthy weight or underweight. Your child's class will take part in this year's programme.

The checks are carried out by registered school nurses or trained health care providers. Children are measured fully clothed, except for their coats and shoes, in a private space away from other pupils. The programme will be delivered in a COVID-safe way, in line with the school and local authority's safety control measures and national guidance for schools and healthcare.

Maintaining the well-being of children in the NCMP

The wellbeing of children and families is very important. Measurements are conducted in a sensitive way, in private and away from other children. Individual results are not shared with your child or their school. The weight and height information is shared only with you in the parent or carer feedback letter. It is your choice if you share the information with your child. If you are concerned about your child's growth, weight, body image or eating patterns, seek further support from a school health nurse or General Practitioner.

The emotional impact of the NCMP has been researched and studies show that body image, self-esteem, weight-related teasing and restrictive eating behaviours do not change as a result of being measured or receiving feedback.

The information we collect and what it is used for is listed below:

- your child's date of measurement, sex and date of birth are used to calculate your child's weight category
- your child's name, date of birth and NHS Number are used to link your child's measurements in Reception and Year 6. Other data sets held by NHS Digital and Department of Health and Social Care. may also be linked as this would let

us add information from health and education records, where lawful to do so, to understand how and why the weight of children is changing, and how this affects children's health and education and how we can improve the care children receive. This includes your child's health data relating to;

- their birth, hospital care (including time in hospital and out-patient appointments and diagnosis of medical conditions)
- mental health
- social care
- primary care - includes all healthcare outside of hospital such as GP and dental appointments,
- public health - including data relating to preventing ill health such as immunisation records
- records for when and the reason why people pass away
- medical conditions such as cancer, diabetes
- health, lifestyle and wellbeing surveys that your child has participated in

your child's ethnicity and address are used to help understand some of the reasons for the difference and changes in child weight across England

All the data collected is also used for improving health, care and services through research and planning.

All this information is treated confidentially and held securely. No individual measurements will be given to school staff or other children.

Parent Portal Registration

Worcestershire School Health Nursing Service is now using a digital system known as School Screener to record and issue the results of screening. Please register for a School Screener Parent Portal Account using the link below:

<https://app.schoolscreener.com/Portal/#/Worcestershire/p/hWorc145/116960>

The School Screener Parent Portal can only be accessed by the web browsers, Google Chrome or Edge.

Once you have registered your child, an account will be created. **If you do not wish your child to be tested, you can 'opt-out' via the Parent Portal.** If you do not have internet access to register an account on the Parent Portal, please let us know.

On completion of the screening, you will be sent a text message to inform you the results are available on the Parent Portal.

How the data is used

The information collected from all schools in the area will be gathered together and held securely by Worcestershire County Council. We will store your child's information as part of their local child health record on the NHS's child health information database and share it with their GP.

All the information collected about your child will be sent by us to NHS Digital. NHS Digital is responsible for collecting data and information about health and care so that this can be used to monitor and improve the care provided to people across England.

The information collected about your child will also be shared by NHS Digital with Public Health England but in a de-personalised form only. This means Public Health England will not be able to identify your child. Public Health England is responsible for working to protect and improve the nation's health.

Both NHS Digital and Public Health England will use the information from the National Child Measurement Programme to better understand numbers and trends in child weight and body mass index (BMI). This helps with the planning of services to support healthy lifestyles in your area. No information will ever be published by NHS Digital or Public Health England that identifies your child.

De-personalised information from the National Child Measurement Programme may also be shared by NHS Digital with other organisations, such as universities. This is to help improve health, care and services through research and planning. This information cannot be used to identify your child, and NHS Digital only ever shares information for research with the approval of an independent group of experts.

Withdrawing your child from the National Child Measurement Programme

If you are happy for your child to be measured, you do not need to do anything other than register on Parent Portal so you can receive the results.

If you do not want your child's height and weight to be checked, or your child has a medical condition that affects their height or weight you must tell us this on the Parent Portal.

Children will not be made to take part on the day if they do not want to.

Yours faithfully,

Dr Kathryn Cobain
Director of Public Health
Worcestershire County Council

Tina Russell
Director of Worcestershire Children First
Worcestershire County Council

How your child's data is collected and processed as part of the National Child Measurement Programme (NCMP)

Local authorities have a legal duty to collect the NCMP data. They do this by following guidance from Public Health England. Local authorities are responsible for making decisions on how the data is collected and for making sure it is protected. Local NCMP service providers are contracted to carry this out; this might be through the school nursing team working in schools or a local healthcare provider. The team collecting the data enter it into the NCMP IT system, which is provided by NHS Digital. The data may also be entered into a local child health information system. Your local authority is responsible for sending the data to NHS Digital. NHS Digital and Public Health England are jointly responsible for the data held at a national level. Your local authority is responsible for the data held locally.

The chart below displays what happens to your child's data as part of the NCMP.
