

BROMCOM STUDENT PORTAL

Students are able to log in either **via the Web or App Version**.

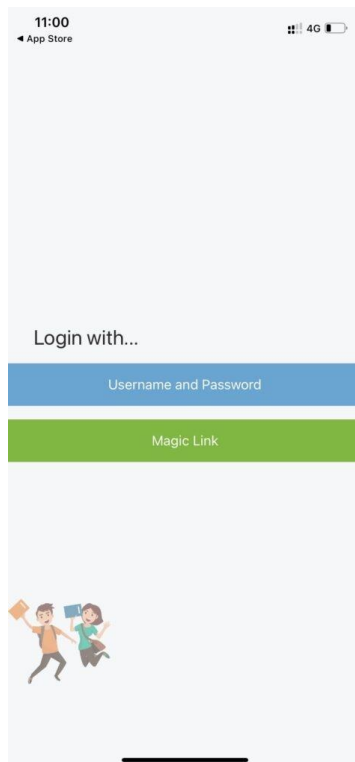

1. Website Version

Students can go to www.bromcomvle.com and choose 'Log in with Microsoft Account'. The username is the school email address, and the password is the password for the email.

2. App Version

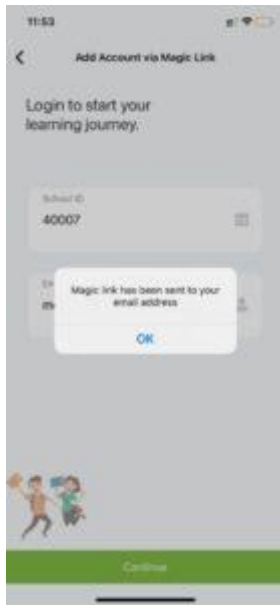

Students can download the Bromcom Student App on their phone and select to log in using the Magic Link. If you are being asked for a code, enter a chosen code but please write it down or memorise it.

The Student would then enter the School ID which is **14043** and their school Email address.

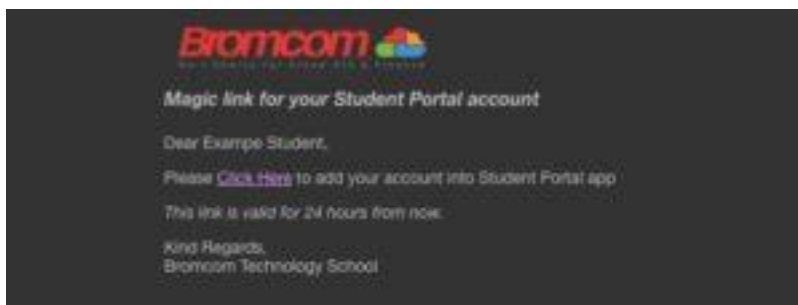

Once the School ID and Email have been entered, the App will state that a Magic Link has been sent to their school Email Address.

Below is an example of how the Email containing the Link will arrive to the Student, which they would then click to open.

Note: Students MUST open the Magic Link Email from a DEDICATED EMAIL APP on the Mobile Phone/Device that the Student Portal App is also installed on.

Clicking this link will enable Students to use Single Sign-On for the Student Portal and bypass the need to enter credentials moving forward.

From now on, when Students log in to the Student Portal either via the Web or App Version, the App will take them straight through after they enter their 5 digit code or use Face/Touch Recognition while the Web Version will take them straight through after they select Login with Microsoft Account.
